

EDC Blockchain

Coin constructor

Instruction

Foreword

EDC platform users can create their own custom tokens, for example, for startups, crowdfunding or business tokenization. Assets created on the blockchain can be traded or stored as a permanent asset.

You will be able to implement various projects: from a simple token for small turnover, to a full-fledged cryptocurrency with advanced features and PoS mining algorithm.

Coin constructor has a simple interface - just set the user settings (depending on the package), and our program will make the rest of it.

We also offer listing on partner exchanges around the world and full marketing support for your project. You can add the created token to any other exchange. For integration, you have to use the API with the link

<https://github.com/EDCBlockchain/blockchain/wiki>.

Support specialists can help you in any question 24/7!

You can get a list of exchanges for listing and tariffs, sending the request to email marketing@blockchain.mn

HOW YOU CAN APPLY THE CREATED COIN.

Use your cryptocurrency in business, trade it on exchanges or introduce it into the global payment system - only you decide what to do with your coin.

To create a crypto asset, select a package depending on the task:

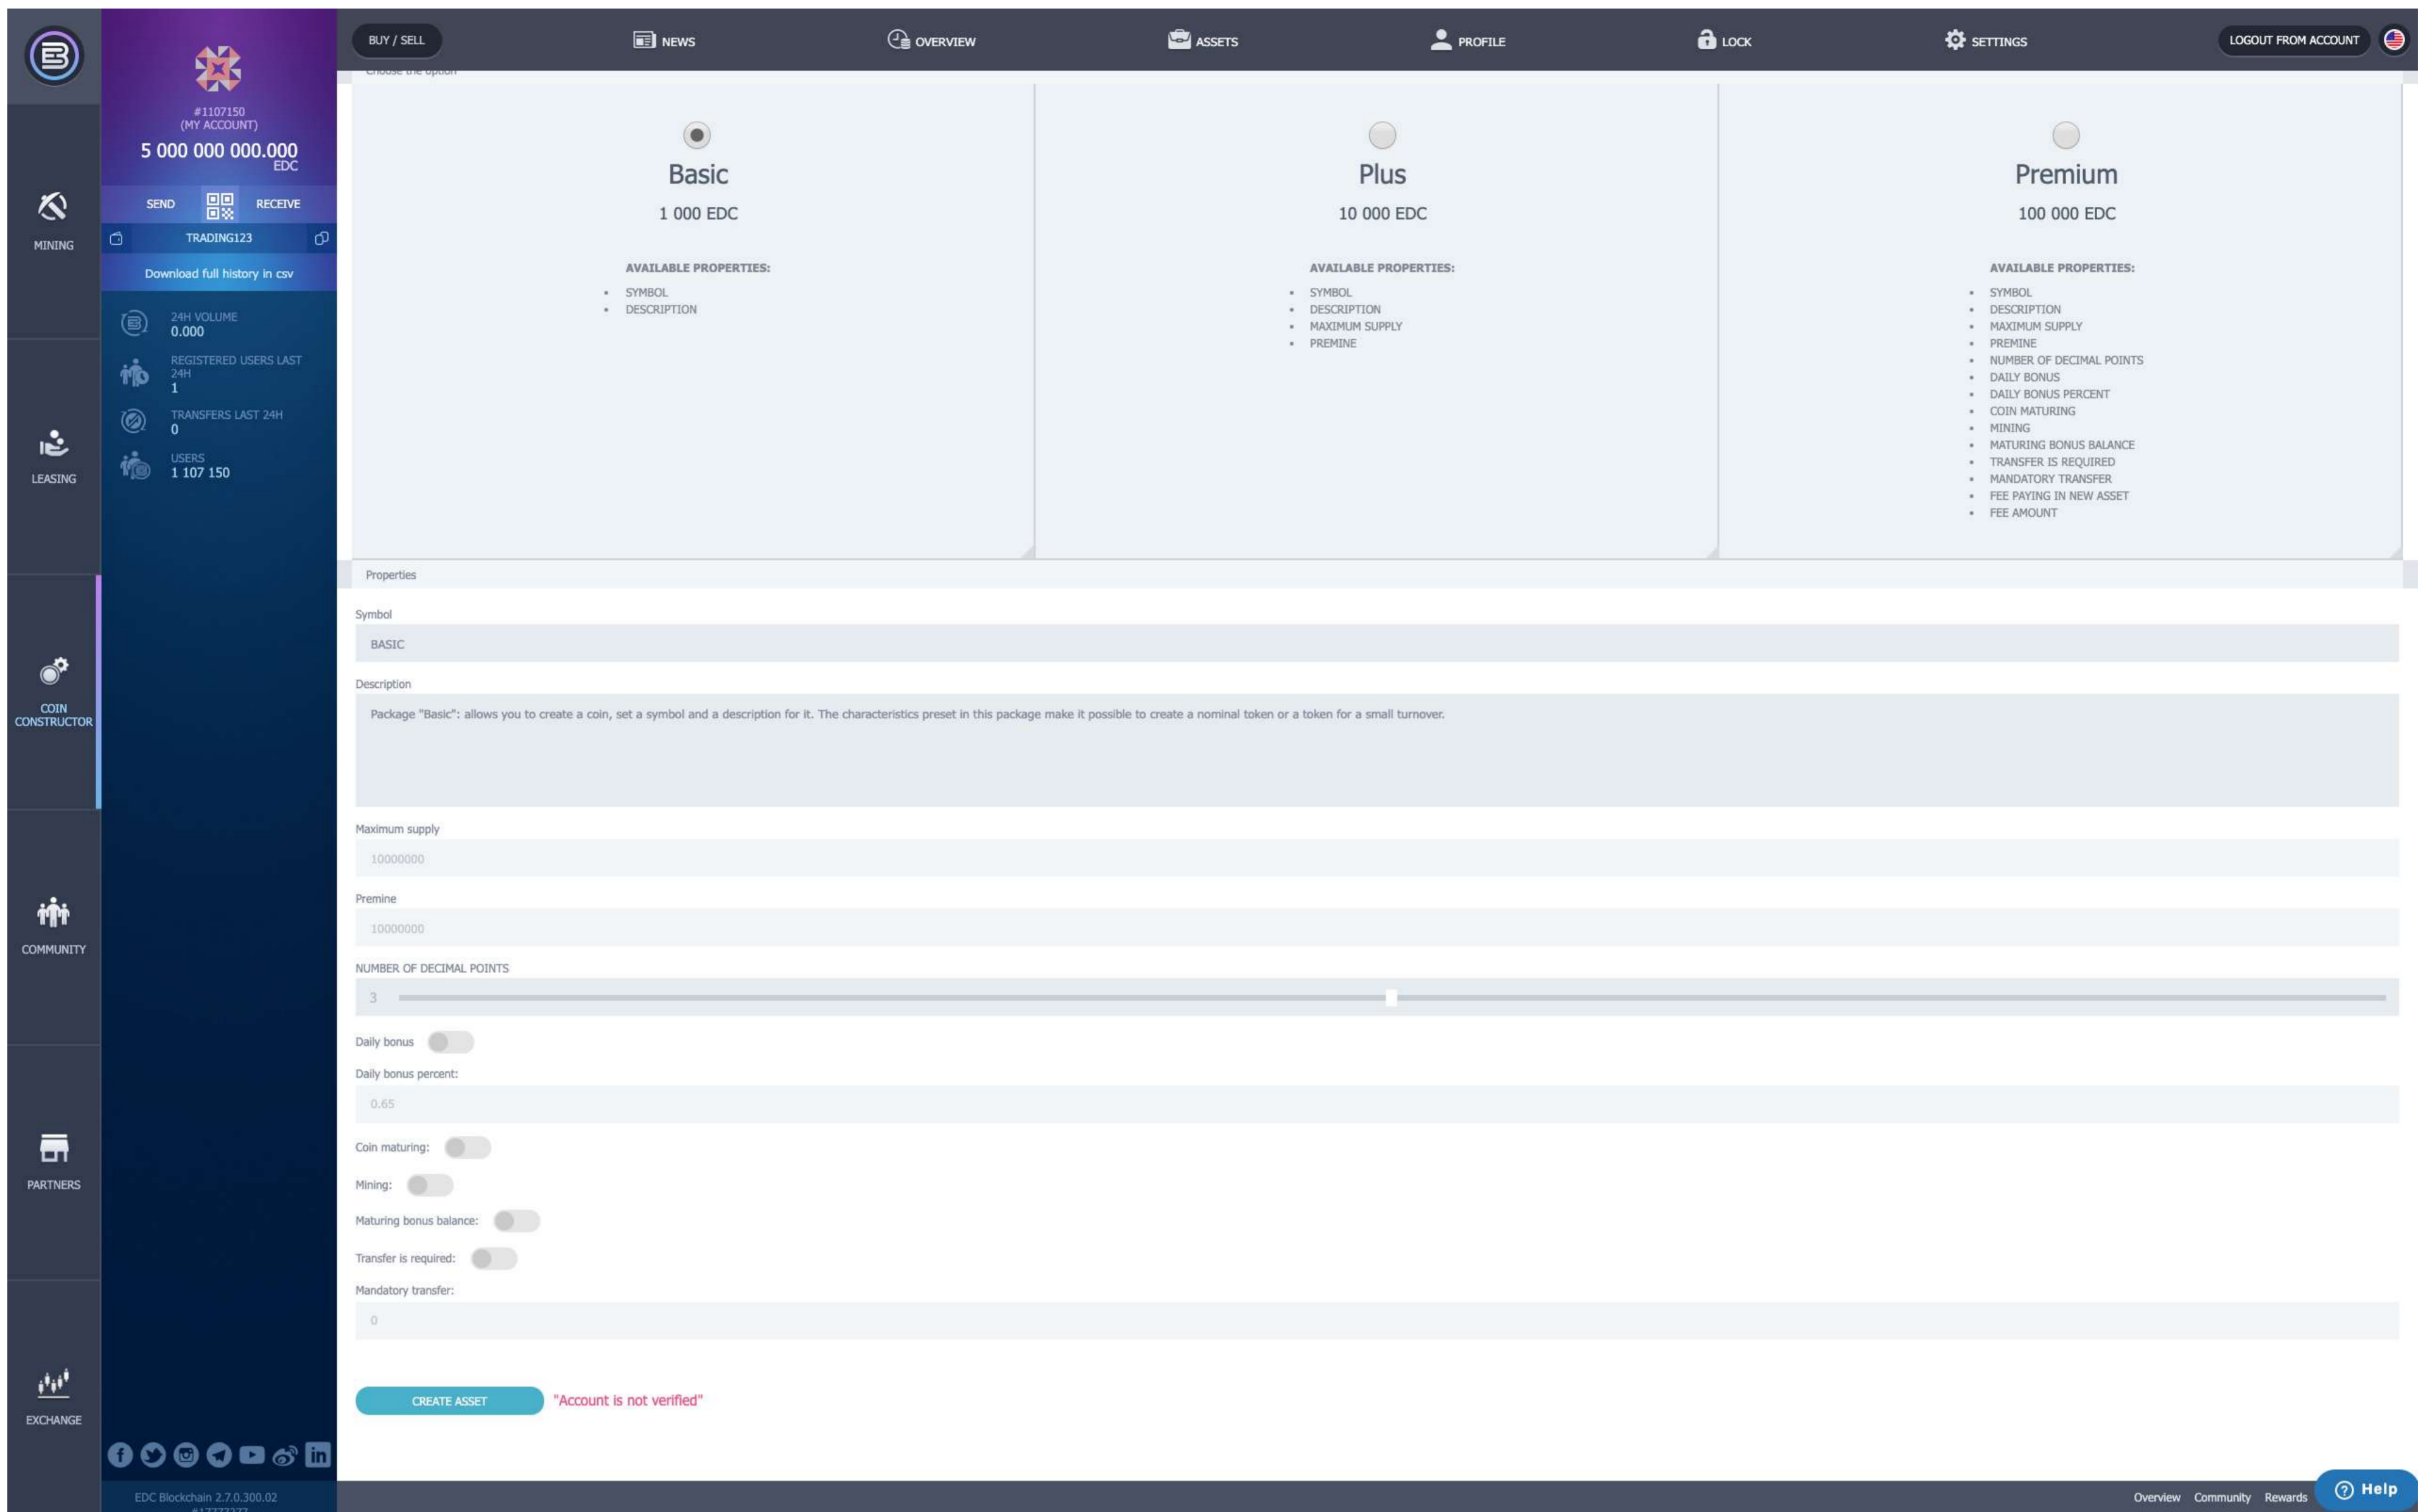

Basic, Plus или **Premium**.

Package «Basic»

The screenshot displays the 'COIN CONSTRUCTOR' interface on the EDC Blockchain platform. The top navigation bar includes links for BUY / SELL, NEWS, OVERVIEW, ASSETS, PROFILE, LOCK, SETTINGS, and LOGOUT FROM ACCOUNT. The left sidebar contains navigation icons for MINING, LEASING, COIN CONSTRUCTOR, COMMUNITY, PARTNERS, and EXCHANGE. The main content area shows three package options: Basic (1 000 EDC), Plus (10 000 EDC), and Premium (100 000 EDC). The 'Basic' package is selected, and its configuration options are visible below, including Symbol (BASIC), Description, Maximum supply (10000000), Premine (10000000), Number of decimal points (3), and various toggle options for Daily bonus, Coin maturing, Mining, Maturing bonus balance, Transfer is required, and Mandatory transfer. A 'CREATE ASSET' button is located at the bottom of the configuration section.

Only verified users have access to create a token on the EDC blockchain.

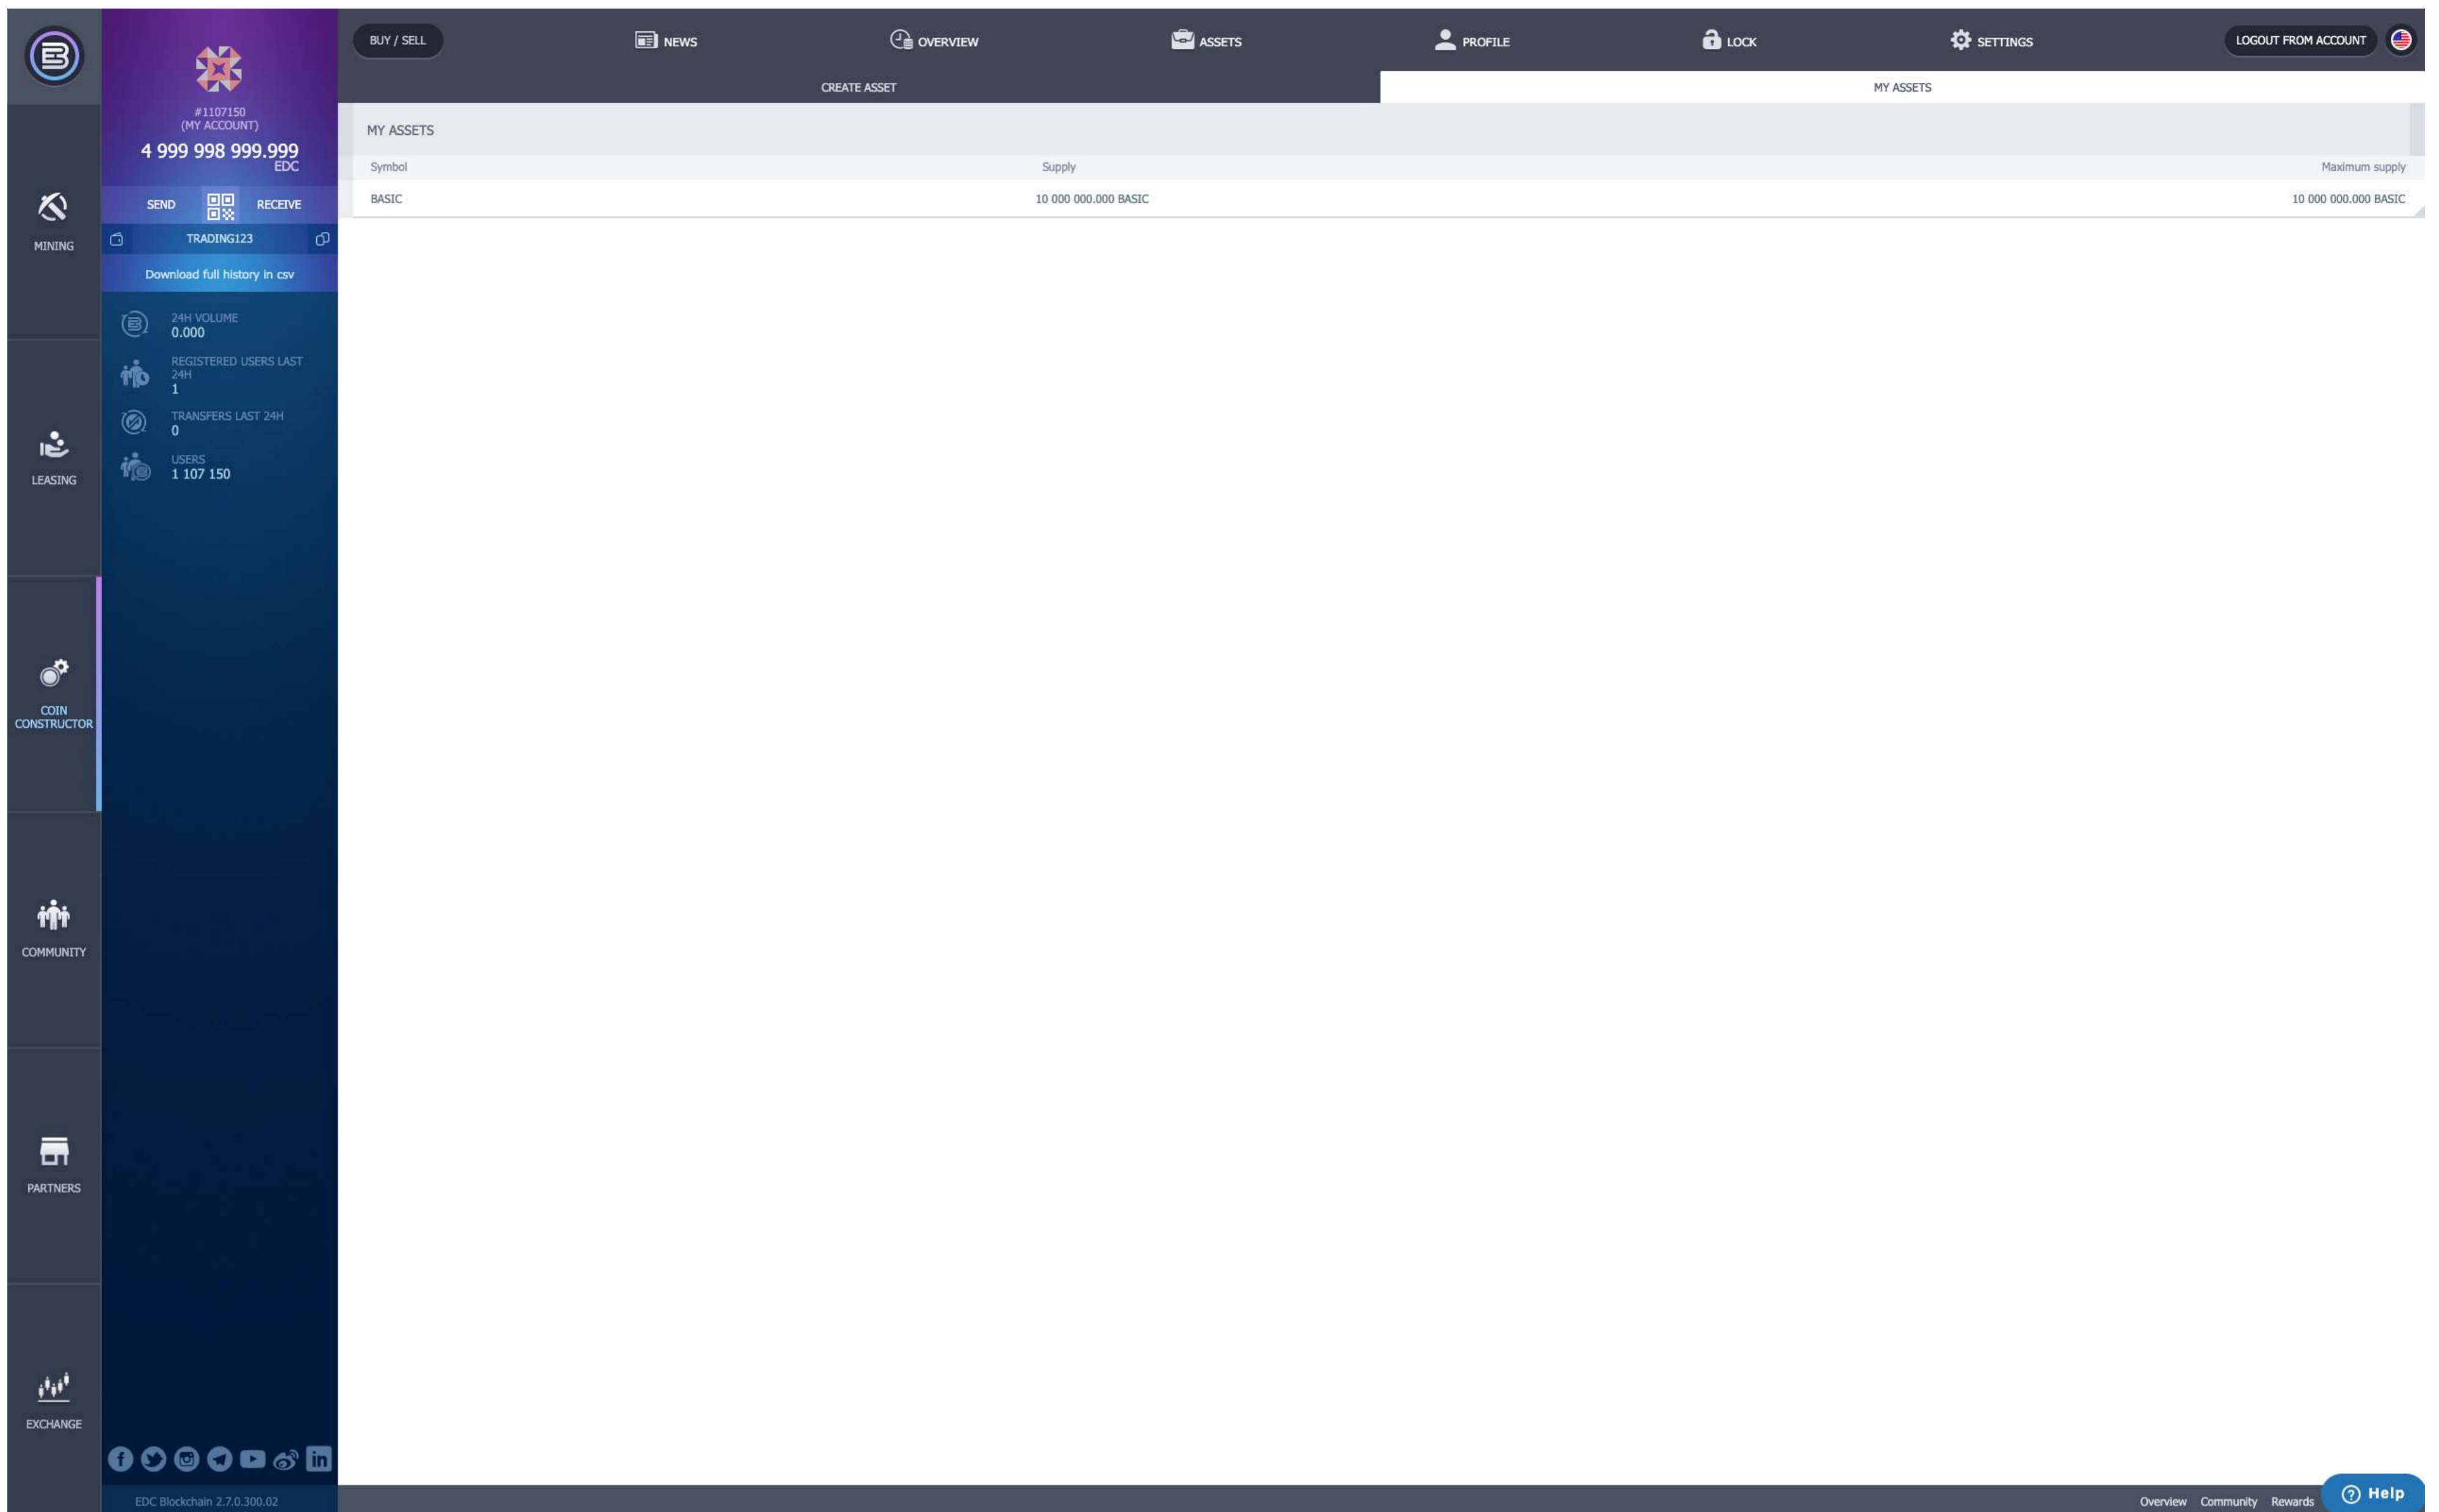

Otherwise, you will get the message like this

How to pass verification, find here

<https://blockchain.mn/wp-content/themes/blockchain/EDC%20Blockchain%20Hints.pdf>

After confirmation you will see the created token.

The number of coins by default is 10,000,000

Package "**Basic**": allows you to create a coin, set a symbol and description. The characteristics preset in this package make it possible to create a nominal token or a token for a small turnover.

AVAILABLE PROPERTIES:

- SYMBOL (coin name)
- DESCRIPTION (make the description about your coin, about the scope of application, about the possibility to earn and about mining)

Information about token creating is displayed in the **Overview tab**.
